### DETAILED ACTION

1. The request filed on 09/15/03 for Continued Examination (RCE) based on parent Application No. 09/550963 is acceptable and an RCE has been established. An action on the RCE follows.

2. The rejections of the previous office action are withdrawn in view of applicant's amendments.

#### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 35, 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Webber et al (5,021,953).

As per Claim 35.

Webber et al ('953) discloses:

receiving from a client computer, an activity indicator, see column 7, lines 17-25;  
developing, at a host computer, a proposed transportation plan corresponding to the received activity indicator, wherein the proposed transportation plan includes computing an optimal arrival time from the activity indicator and the transportation origin, see (from Laguardia, arrive no later than 9pm, and column 7, line 53 – column 9, line 6;

receiving from the client computer an indication of the proposed transportation plan, see figure 1 (10, 14, 18) and column 15, lines 35-42;

receiving from the client computer, an indication of approval of the proposed transportation plan, see column 15, line 41-42 and column 16, lines 43-46;

responsive to receiving the indication of approval, arranging transportation according to the transportation plan, see column 16, lines 47-66.

As per Claim 37.

Webber et al ('953) discloses:

the activity indicator includes a plurality of transportation parameters and wherein the step of developing a proposed transportation plan includes developing, at the host computer, a proposed transportation plan corresponding to the received plurality of transportation parameters, see column 7, lines 17-25 and column 16, lines 47-66.

#### ***Claim Rejections - 35 USC § 103***

Art Unit: 3629

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 36 is rejected under 35 U.S.C. 103(a) as being unpatentable over Webber et al (5,021,953) in view of Treyz (6,526,335).

As per Claim 36.

Webber et al ('953) discloses a PC or terminal, see figure 1, (10 and 12) communicating to the host, but does not specifically disclose a personal information manager.

Treyz et al ('335) teaches the equivalence of notebook computers, laptop computers and handheld computing devices (which are seen to be personal information managers), see figure 13 (298).

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to communicate to the host with a handheld computing device in the invention of Webber et al as taught by Treyz et al as an obvious equivalent device.

#### ***Allowable Subject Matter***

5. Claims 1-37 are allowed.

6. The following is an examiner's statement of reasons for allowance:

As per Claims 1, 12, 27, 32.

The prior art of record, specifically Garback ('499) in view of DeLorme et al ('040) further in view of DeMarcken ('808) does not disclose or fairly teach:

computing an optimal arrival time from the activity start time, the activity location and the first airport;

identifying an optimal ground transportation option between the first airport and the activity location; and

providing an optimal trip option for transportation from the origin location to the activity location, wherein the optimal option includes the first identified operating flight and the optimal ground transportation option.

The claims that depend from the above are allowed for the same reasons.
